Self Adhesive Prints

5 BUSINESS DAYS

Print and Stick 5 mil self adhesive-backed matte material for temporary graphics. Perfect for wall graphics, this matte printable fabric is designed for smooth, effortless application to a wide range of flat surfaces and it will not rip, wrinkle, or stretch in production making it easy to cut into any shape. Application ideas include wall cut-outs, wall murals, decals, signs, window graphics, and more.

Tough Vinyl is a more permanent 5-mil adhesive-backed vinyl , yielding colorful photos to be printed on this durable, weather-resistant surface.
The TOUGHcoat™ layer provides such exceptional resistance to water and scratching that graphics printed on this material will last up to 8 months outdoors without lamination. Prints will last up to two years outdoors when laminated . The strong, permanent solvent-based adhesive sticks to most popular sign substrates and removes cleanly for up to 90 days. Application ideas include POP/ indoor signage, vehicle graphics and temporary outdoor signage.

Drymounting and Laminating

6 ADDITIONAL DAYS (NOT INCLUDING PRINT)

Foam-cor®: 3/16" thick lightweight board. Ideal for custom framing or short term mounting on its own. Available in black or white.
Gatorfoam®: 3/16" thick heavy-duty foam board. A more robust option which is less likely to bend or warp due to changes in humidity. Available in black or white.
3mm Sintra: Expanded rigid PVC board, very versatile substrate that unlike Foam-Cor or Gatorfoam can be curved or bent slightly.
Dibond: Archival - rigid - light - two pre-painted sheets of .012" aluminum with a solid polyethylene core mounted with Seal Print Mount 831 adhesive.
Laminating: Perfect for Fine Art, photographic and plain paper media. They can be dusted or wiped with a damp cloth. ***Standard Laminate:*** Lustre - Also available in Matte

Ready to Hang - Fine Art Canvas

10 BUSINESS DAYS

Nothing beats your favourite image on the wall - In Canvas! Have your image wrap around the edge of the canvas, or finished with a white or black edge. All prints come ready to hang in the size you want. All of our canvas prints for both the standard matte and pro satin are now stretched on heaveyweight pro 1.5" stretcher bars.

While both options are stunning, the Pro Satin uses a heavyweight Satin canvas and has addtional finishing on the back of the print.

Ready to Hang - Metal Prints

10 BUSINESS DAYS

Create unique prints on Chromaluxe® aluminum panels with a high gloss finish and a luminous quality. Metal printing is just that – printing on metal. We use a special high heat sublimation process resulting in images that have an amazing depth. These prints have a similar lifespan to traditional photographic prints. The Vibrant Glossy Metal prints have a white backing resulting in a traditional look, while the Brushed Metal Glossy print allows the brushed metal to show through on lighter areas of the image. All prints come ready to hang with smaller sizes having the option to come with an easel stand in place of a wall hanger.

Ready to Hang - Plaquemount, Floatmount

10 BUSINESS DAYS

Plaquemounts are mounted on 3/8 inch thick MDF (wood) base with a beveled and hand painted black edge. Prints come with a UV laminate and a pre-cut slot on the back ready for hanging.
Floatmounts are mounted on 1/8 inch tempered Masonite and have a recessed back that makes the print appear to 'float' away from the wall. Prints are laminated with a UV laminate. Floatmounts are much lighter than Plaquemounts, and are therefore a great choice for mounting large prints.
Acrylic Prints Glossy prints are face-mounted on a clear Acrylic and then finished as a Floatmount or Plaquemount option. This method provides added brilliance, depth, and an intensity unattainable by standard finishing.

Prices includes photographic print and laminate. All print surfaces are available. Prints must be laminated with one of your choice: Matte, Lustre with matte the default surface.

PRINT SIZE			PLAQUEMOUNT	FLOATMOUNT

Print from Print

10 BUSINESS DAYS

A great inexpensive way to copy photographs, we copy photographic prints ranging in size from wallets to 8x12 in colour or B&W. As this process is automated, Images should also be free of dust, free of tears, tape, staples and any other defects that can interfere with the scanning process. With this service there is no original image cropping or custom sized copy prints. If image cropping or custom sized prints are required we need to do a digital copy negative and the appropriate size.

All E6 slide film is sent to our outlab, add $15.00 for shipping and remember a 3 week turn around.

Cross Processing of E6 film $3.00 per roll extra

*** 110/126 film developing that requires scanning or prints are two weeks in-lab

Push processing on most all rolls is an extra $3.00. However, specifically for colour negative 135-36 exposure or 220 format film is sent to another lab and is an additional $15.00 per batch

* 4x5, 5x7 and 8x10 sheet film is processed at a outlab. There is a $15.00 additional charge (per batch) on all orders to accommodate for shipping charges.

Additionally you can have your files sent to you via WeTransfer for $4.99. Orders requesting WeTransfer must be prepaid.

Consumer Film Scans

6 BUSINESS DAYS

The most economical way to transfer negatives or slides to digital format. This service is available from 35mm, APS and 120 film. We can scan your roll at the time of developing, or from your existing negatives. Please NOTE! All other sizes of film must be Pro Scanned (see Pro Scan section for pricing). All colour negative film and slide films are scanned with Digital Ice ™ which is a automatic dust removal system that removes most (not all) dust and some scratches. Due to technical limitations, Black and White film cannot have Digital Ice ™ applied. Files are JPG files, are compressed therefore the file size on hard drive will be smaller that the file open.

Digital Copy Negative and Digital Copy Negative Advanced

6 BUSINESS DAYS

Digital Copy Negative is for flatbed scanning flat work up to 11x17. With Digital Copy Negative Advanced we photograph the pieces with two polarized light sources and a polarized lens. This process must be used for larger pieces over 11x17 such as paintings but also can be used for smaller prints that are highly reflective or have bends or damage that a flatbed scanner scanner will pick up. A copy of the digital file is given to you on USB or optional CD for an extra $4.00.

ITEM	DESCRIPTION	PRICE
Digital Copy Negative	Print to USB - Original size print up to 11x17 inches	$9.99
Digital Copy Negative Advanced	Print to USB - Original larger than 11x17 to a max of 20x24 inches or refective pieces.	$39.99

We can copy items larger than 20x30, please contact us for details.

The cost of a USB is included in the scanning price or you can have images returned on CD for an additional $4.00

Pro Scans from Film or Prints

6 BUSINESS DAYS

Pro Scans are for when you need to step it up. We scan Colour or B&W negatives, slides and prints. These RGB, 8 Bit, sRGB scans are processed with Digital Ice (colour only negative -Digital Ice does not work with B&W film or on prints) and dust busted in Photoshop. Each file is carefully optimized and saved to a USB.

Professional Digital Copywork/Retouching

7 BUSINESS DAYS

Bring your original and we'll capture it digitally, make any colour management decisions required and provide you with a proof for your approval. The image can then be output to your specifications. This service is designed for originals such as paintings where colour fidelity in each tone is paramount as our experts painstakingly adjust each channel for optimum matching. Additionally, other specialized digital work can be quoted on a per hour basis. It is best to visit us in person to discuss your needs.

Service	Price
Originals up to 20x40	$119.99
Digital retouching work — Quoted on a per job basis	$80.00/hr

The cost of a USB is included in the scanning price or you can have images returned on CD for an additional $4.00

Restoration and Manipulation

7 BUSINESS DAYS

Using the latest digital imaging techniques we restore tears, blemishes, cracks, faded colour and density. We can remove, add people, or other elements to the photograph, hand-colour black and white images as well as remove distracting objects in the background by replacing the original background with a studio backdrop image. (See in store for samples)

All work is saved to a digital file and returned to you on a USB with no harm to the original. We have created 5 categories of retouching. Hand colouring and the removal of background objects are usually classified as a heavy restoration, however it may be as low as medium depending on how much work is required.

	LIGHT	MEDIUM	MED-HEAVY	HEAVY	GROUP HEAVY
Retouching Level	**$34.99**	**$49.99**	**$69.99**	**$79.99**	**$99.99**

The cost of a USB is included in the scanning price or you can have images returned on CD for an additional $4.00

Gather Box

VIDEO TAPES 6 WEEKS other 10 BUSINESS DAYS

Our Gather Boxes make archiving easy and they are perfect for someone just starting off with an archiving project. We have four types of Gather Boxes: prints, slides, slide carousel, and tapes. Inside, find instructions and tips to guide you through the sorting and gathering process. Pick up your empty box to fill with memories and leave the rest to us. Please note that on Gather box prints, we batch by print size and there is no guarantee that prints art scanned in order. There are additional charges to keep prints in order and additional charges to create seperate folders for the scanned files.

Photo Calendars

7 BUSINESS DAYS

We offer five diverse calendar options. Our donsphoto.com online ordering system has a terrific variety of template options for Calendars. The first option is a 12 month press printed 11x8.5, center stapled calendar which is great for an every-day calendar. The second 11x8.5 calendar is center coil bound, on photographic paper and the images are sharper and more vibrant than the press calendar. The third option is a 12x18, 12 month, single sided calendar again on photographic paper. The 5x7 Calendar has 12-5x7's with image, one month per page and finally the single page 12x18 wall calendar.

ITEM	DESCRIPTION	PRICE

256GB card	Includes recovered data on 256 GB USB	**$149.99**
512GB card	Includes recovered data on 512 GB USB	**$249.99**

Video Transfers: Tape to MP4

5 WEEKS

We transfer VHS, s-VHS, VHS-c, 8mm video, hi-8 video, digital 8 video, mini-dv, mini DVD, Betamax, SD cards to MP4 files. You will receive a better quality transfer and more universal file format if you have your VHS or other tapes transferred to MP4 file format on USB. For transfers to MP4, our 16 GB usb is provided and included in the price. Approximately 5 GB of storage is needed for each hour of video. Yes, on special request we can have a transfer made into a traditional DVD but we will make and charge for the MP4 files first then convert and charge for the DVD.

If a tape is blank or has copyrighted material and therefore no transfer can be done, there is a $20.00 fee per tape. The reason for this is that we must run each tape in it's entirety.

Any recorded television show, movie, purchsed movies or program that has been broadcast are considered copyrighted material and will not be transferred.

DESCRIPTION OF SERVICE	PRICE *MP4*
Video tape to MP4 - 1 tape to 16GB USB (included in price) Each tape	**$42.99**
DVD - This is a DVD playable in a DVD player. This is a special request and an additional charge for every 2 hours	**$14.99**
Extra copy USB or DVD copy when ordered initially	**$7.99**

Video Tape Repair

5 WEEKS

Most physically damaged video cassettes can be repaired or spliced. When repairing the actual tape, damaged portions must be removed.

If a tape requires a physical splice, it is highly recommended that it be copied to DVD or digital file (see above video transfer prices) and not played in a VCR. Splices made to video tapes are likely to create a head clog, meaning the VCR must be opened and cleaned.

DESCRIPTION OF SERVICE	PRICE
Splice video tape	**19.99**
Replace cassette shell (add to above price is necessary)	**19.99**

Video Transfers: Foreign Video

5 WEEKS

Foreign tape (VHS only) and DVD conversions can be done, to and from foreign source, to and from North American DVD (NTCS).

It is possible to convert *most* foreign DVDs to North American standard DVDs, *but not all*. Not only are there different video standards, there are also different regional standards and some manufacturers of DVD camcorders have added copy guard to their internal recording software. This is not an issue of copyright, but an issue of companies trying to encourage brand loyalty... not all can be dealt with. DVDs recorded in a Sony Camcorder are particularly of issue.

Some artifacting may occur in the converting process. Scenes with a lot of movement can lose some fluidity.

Digital Files for foreign conversions (SD AVI or SD MOV) are available upon request.

DESCRIPTION OF SERVICE	PRICE *DVD*	PRICE *MP4*
Up to 2 hours	**$49.99**	**$49.99**

5 WEEKS

Transfer from standard audio cassett to MP3 files. Files will be provided on a 16GB usb that is included in the price.

Minimum Charge $47.99

DESCRIPTION OF SERVICE		PRICE
Audio Transfer - each hour charge in 1 hour blocks	Minimum Charge of $47.99 per order.	**32.99**

Home Movie Reel Film Transfers to digital 8mm and 16mm

5 WEEKS

All motion film is transferred on new frame-by-frame transfer units. These units basically take a 1920x1080 hi res scan of every individual frame and those frames are reassembled into a playable video file. These individual jpeg images of each frame are what are known as the Master Image Sequence (MIS) . A MIS is perfect for the customer who wants a backup that will allow them high quality, flexible format that can be easitly converted to other formats in the future. Each reel of film will have it's own folder with each and every frame of that reel accessible as a jpeg file.

Transfer is to - MP4 or - .MOV. Transfers to MP4 or .MOV and will be written to a 16GB USB drive. A quick rule of thumb is that you will need about 4 GB of storage for every 50' reel of film that you are having transferred. We can transfer to DVD on request, but it costs more and is lower quality. Additional DVD copies must be ordered at the time of transfer. Extra copies of a DVD at a later time are $25.00

Each new reel of film being transferred to DVD will have a new chapter title on the DVD menu. Chapter titles can be provided by the customer (up to 2 rows of 20 characters for each reel of film). If a chapter title is not provided we will title the chapter with the number in which they were transferred. Efforts are made to try and place film in chronological order is possible. Minor film repair is done at no charge. If extensive repairs must be done, you will be notified of any extra charges before we proceed.

IMPORTANT NOTE: The charges are now $0.60 per foot AND a charge of $3.00 per reel on every order. The actual footage count is calculated by our scanner.

DESCRIPTION OF SERVICE		Price
Price per foot	Minimum Charge of $49.99 per order.	**.60/foot**
Charge Per reel		**$3.00/reel**

Chapter Titles: $3.00 per title (plus reorganization price if applicable).
Extra Copy DVD - $15.00
Add a DVD or MIS to MP4 transfer is $14.99 per reel regardless of that reel length.
Add extra copy of MP4 **$10.00**
A rough guide: 3” diameter = 50 feet; 4” diameter = 100 feet; 5” = 200 feet; 6” = 300 feet; 7” = 400 feet. The actual footage count is calculated by our film scanner.

Movie Film Processing and Very Old (Seattle Film works) still film

18 WEEKS

All still or motion picture film, once developed is scanned, digitally enhanced, is burned to CD. We process what is positive colour film as black and white (and as a negative) as that is the absolute best way to ensure that some sort of image is produced. After developing, it is recommended that motion picture film be transferred to Digital File (MP4 or MOV). Much of the motion picture film is developed into a B&W negative in order to salvage something from it. Some form of transfer in these cases is necessary so that it is viewable by the customer.

Though most types of film can be developed, the quality and success rates depend on many factors. Some films tend to come out very well, some okay, and some very poor. It must be noted that these films are often decades beyond their expiry dates. See lab for more information with specific details as to the film brand, format, and exact type. Kodachome film can only be processed to Black and White.

The retrieval of recognizable images from still film is guaranteed or there is no charge. "Recognizable" does not mean "of good quality", it only means that there is a physical image within the frame of the negative.

Depending on when the film is received, processing may take up to 18 weeks.

DESCRIPTION OF SERVICE		PRICE
All still film developing (including Disc film)	**files returned on usb**	**$89.99**
Super 8 Cartridge processed as Black and White and scanned as MP4 (each cartridge)	**MINIMUM CHARGE FOR BLANK IS $40.00**	**$99.99**
16mm processed as Black and White and scanned as MP4 (per100')	**MINIMUM CHARGE FOR BLANK IS $80.00**	**$189.99**
Prints from Disc film (already developed)*		**$44.99**

*Disc film scans are 2400dpi. Though fairly high resolution, the negatives are so very small, and digital artifacting will show up on prints over 5x7
